## **EXTRUSION PROCESS, APPARATUS AND PRODUCT**

## **ABSTRACT**

A process for the manufacture of cooked cereals or dry pet food by preparing a

mixture of water and a dry premix mainly comprising cereal flour or semolina, and pressing
the mixture, with the aid of a gear pump, firstly through a heat exchanger wherein it is
cooked and then through an extrusion die to form an extruded product. Also, an apparatus for
carrying out the process and a product obtainable by the process.
